## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-79, drawn to a hole forming apparatus, classified in class 606, subclass 185.
  - II. Claims 80-86, drawn to a method of forming a hole in the wall of a vessel, classified in class 128, subclass 898.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to form holes in other tissues or workpieces.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

3. This application contains claims directed to the following patentably distinct species of Group I:

Species 1 with subspecies 1a and 1b: Figure 1A and Figure 1B, respectively;  
Species 2: Figure 6,  
Species 3 with subspecies 3a-3i: Figures 7A-7I, respectively;  
Species 4: Figure 8A,

Art Unit: 3731

Species 5: Figure 9A,  
Species 6: Figure 10A  
Species 7: Figure 11A,  
Species 8: Figure 12,  
Species 9: Figure 13,  
Species 10: Figure 14A  
Species 11 with subspecies 11a and 11b: Figure 15A and 15B, respectively;  
Species 12: Figure 16A,  
Species 13: Figure 18,  
Species 14: Figure 19A,  
Species 15: Figure 20A,  
Species 16: Figure 21A, and  
Species 17: Figure 22A.

The species are independent or distinct because they differing structures and modes of operation.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species or subspecies (e.g., Species 1a) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic to Species 1a –Species 16.

Applicant is advised that a reply to this requirement must include an identification of the species or subspecies that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3731

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
